

MANUAL QR CODE

Access Manuals Easy with QR Codes Now!

Summit Industries is excited to expand our QR code feature across all medical systems!

With a quick scan, you can instantly access the system manual right from your device, eliminating the need to search through files or wait for emails. This enhancement helps make service calls smoother and more efficient by putting the information you need at your fingertips while onsite.

We'd love to hear your feedback as you start using this feature. More tools and improvements are coming soon.

Congratulations to the
Field Service Engineers
who have completed
certifications:

Alex Manenkoff on Nova OTC &
SHFR
